Why are energy prices higher in Hawaii than in other states? What policies will enhance efficient energy pricing?

Should I put a solar panel on my rooftop?

Electric, hybrid, conventional... which car would I buy?

Oil, natural gas, biofuels, solar, wind... How do we strike a right balance among various energy options?

In this course we will learn about how energy markets work, circumstances when markets do not lead to efficient energy use, and the forms of government regulatory intervention that may work to alleviate market failure.

Pre: ECON 120, 130, or 131.
