ECONOMIC FORECASTING
Econ 427

Peter Fuleky
TR 10:30 – 11:45 am

Learning Outcomes:

- Learn the statistical basis for forecasting methods.
- Become a competent user of econometric and forecasting software.
- Master some key business and economic forecasting tools.
- Apply your skills within a practical forecasting project.
- Present your work to a knowledgeable audience.

In this course you will learn all of the above, and more:

- Statistical methods for modeling and forecasting trend, seasonal and cyclical components of economic time series.
- Multivariate regressions models.
- Forecast evaluation.
- Forecasting in the presence of unit roots.
