Industrial Organization
Econ 470
(Writing Intensive)

Professor Ruben Juarez
TR 9:00am-10:15am

- Industries often interact and compete with each other. Sometimes they engage in anticompetitive practices.
- Learn price competition, product differentiation, price discrimination, predatory pricing and vertical integration.
- Learn the role of public policy in the markets, for instance regulatory laws and antitrust/competition policy.

- This course will study Economics models on how firms behave among them.
- You will have the chance to apply the theory learned into a Final Paper and other contemporary projects.
- This course is especially desirable if you are interested in a career in industry, government or wish to apply to graduate school.

(Prerequisites: ECON 301)
